Calnesium 2-0-0 is a nutrient additive that will boost both Calcium and Magnesium availability to your plants when added to your feed program.

It is a powerful blend of Nitrogen, Calcium, and Magnesium that is specifically designed to provide an additional nutrient boost to our Future Harvest Holland Secret 3 Part fertilizer for crops that demand it. It is an excellent additive to prevent end rot on tomatoes and peppers.

Calnesium is 100% compatible with all high quality nutrients as it mixes quickly and easily. Calcium, Magnesium, and Iron are incredibly important to photosynthesis (making energy from light) and maintaining the structure of the plant. Calnesium works as part of your feed program and as a foliar spray.

## KEY FEATURES

- Inhibits blossom end rot by providing additional Calcium and increasing nutrient uptake.
- Increases water, nutrient, & carbon dioxide uptake.
- Strengthens plant cells and tissues for increased resistance to stress.
- Increases cell division and plant tissue development.
- Increases flower and fruit sets.
- Increases chlorophyll production.
