## ROYAL BLACK Humic Acid

### DILUTION RATE:

Use 1.25 ml (cc) per litre (3/4 tsp per gallon)  
or 25 ml per 20 litres (1 fl. oz per 5 gallons).

### GUARANTEED ANALYSIS:

6% Humic Acid from Humalite

### Derived From:

Leonardite

### GROWTH STAGE:

Rooting  
Vegetative  
Flowering

### FOR USE IN:

Soil  
Coco  
Hydroponics

### FREQUENCY:

Pre-treatment  
Every feeding

Royal Black is OMRI Listed for Organic Use.

Humic Acid chelates nutrients like magnesium, calcium, and iron. It provides natural carrier compounds that transport nutrients and vitamins into your plants to more efficiently enhance their growth.

It stimulates roots and enzymatic function, increases vitality in seedlings and clones, and assists in the more efficient utilization of nutrients and vitamins.

## KEY FEATURES

- Suitable for soil and coco and works well with any branded fertilizer or additive.
- Pre-treat pots with Humic Acid, especially when using coco (this does not contain any humate matter like soil) to get plants off to a good start!

SIZE	HEIGHT X WIDTH	WEIGHT
500 mL	7.5 in x 2.5 in	1.1 lbs
1 L	9.0 in x 3.0 in	2.2 lbs
4 L	12.5 in x 6.3 in	8.8 lbs
