Dear Mr. Foley:

**RE: Bio-Lux Foam Soap / Savon Mousse, Impact Citro-Max, Resistol Boom, Safeblend Graffiti Remover / Decapant de Graffiti and Saniblend 66**

This is in reply to your letter of June 27, 2014 seeking our comments on the acceptability of the subject products in Federally Registered Food Establishments. This also is in reply to your letter of June 27, 2014 to the Canadian Food Inspection Agency (CFIA) which was forwarded to us on July 8, 2014. The agency requested our Bureau to assess the safety of these products based on their chemical compositions and the proposed uses.

**RE: Bio-Lux Foam Soap / Savon Mousse**

Based on the information provided, we can advise that we see no reason to object to the use of this product as a hand soap in food processing plants provided that:

- a) There will be no contamination of food as a result of its use;
- b) After use, hands are thoroughly rinsed with potable water before handling food in the plant; and
- c) The product will not leave residual fragrance on the hands of employees handling food.

The label of the product, as presented, is deemed acceptable for its use in food plants.

**RE: Impact Citro-Max**

Based on the information provided, we can advise that we see no reason to object to the use of this product as a cleaner/degreaser in food processing plants provided that:

- a) There will be no contamination of food as a result of its use;
- b) All surfaces subject to direct food contact must be thoroughly rinsed with potable water before reuse; and
- c) The amount of product used should not be in excess of that required to achieve its intended technical effect.

The label of the product, as presented, is deemed acceptable for its use in food plants.

**Canada**

**RE: Resistol Boom**

Based on the information provided, we can advise that we see no reason to object to the use of this product as a remover of wax and other finishes for floors in food-processing plants provided that:

- a) There will be no contamination of food as a result of its use and storage;
- b) It is not used on food contact surfaces;
- c) The amount of product used should not be in excess of that required to achieve its intended technical effect; and
- d) After use, there is a rinse with water until all residues have been eliminated.

The label of the product, as presented, is deemed acceptable for its use in food plants.

**RE: Safeblend Graffiti Remover/ Decapant de Graffiti**

Based on the information provided, we can advise that we see no reason to object to the use of this product as cleaner in food processing plants provided that:

- a) There will be no contamination of food as a result of its use and storage;
- b) It is not used on food contact surfaces;
- c) The amount of product used should not be in excess of that required to achieve its intended technical effect; and
- d) All food should be removed from the vicinity or protected from the spray.

The label of the product, as presented, is deemed acceptable for its use in food plants.

**RE: Saniblend 66**

Based on the information provided, we can advise that we see no reason to object to the use of the subject product as a disinfectant in food processing plants provided that:

- a) There will be no contamination of food as a result of its use; and
- b) Equipment and surfaces subject to direct contact with food are thoroughly rinsed with potable water after treatment with the product.

The label of the product, as presented, is deemed acceptable for its use in food plants.

Yours truly,

*Marina Vivas*
