

IPA SANITIZER

Isopropanol-Based Hard Surface Sanitizer

DESCRIPTION: IPA Sanitizer is an isopropyl alcohol based hard surface sanitizer. It is excellent for use in food plants and other facilities where sanitation is a high priority. IPA Sanitizer is available as a solution, spray or as pre-soaked wipes for easy use.

DIRECTIONS:

A. Food Contact Hard Surface Sanitizing: Thoroughly clean and rinse hard and non-porous surfaces with potable water. After water rinse has completely drained from clean surfaces, IPA Sanitizer can be applied undiluted with a specialized mechanical sprayer (Biomist™ Power Sanitizing System), Excellent for reaching crevices or areas which are difficult to reach by wiping. No rinse is required.

B. Spot Sanitizing During Production: Spray IPA Sanitizer onto contaminated surface, wipe clean with paper towel and spray again with IPA Sanitizer. DISCARD PAPER TOWEL.

C. Mid-Shift Clean-Up: At start of mid-shift clean-up, spray IPA Sanitizer on to surfaces/equipment to aid in microbe/bacterial control. Heavily soiled areas can be wiped with paper towel and then re-sprayed with IPA Sanitizer.

ACTIVE INGREDIENTS: Isopropanol.

Flammable Liquid N.O.S. UN 1993

NOTE: Avoid contamination of food products in the application and storage of this product. Store in a cool, dry area, away from sources of ignition and incompatible products. Container should be closed when not in use. Product should not be stored in food processing or food storage areas.
